# tints of nature™ - WORKING WITH THE SHADE

## CHART

The natural range of colours runs from **1N** to **10N**.

These are designed to cover grey hair and give a natural result.

The fashion colours will add tone to natural hair, ranging from mahogany to ash.

To cover grey hair with a fashion colour you must mix it with a natural colour in equal amounts.

E.g. 35mls **5D** + 15mls **5N** + 50mls of **Colourfix** (save the balance of unmixed colour for next application).

To increase the colour range you may intermix the fashion colours.
